## DETAILED ACTION

### *Election/Restrictions*

1. Claims 1-14, 16, and 18-28 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention and a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 8.

### *Drawings*

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the pulling unit, the processing line, the step of opening the channel and the edge channel must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### *Claim Rejections - 35 USC § 112*

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 15 and 17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 15, it is not clear what “opening the channel (s)” encompasses. Are there some gate or door in the channel to release the edge?

In claim 17, it is not clear what “forming a loop of edges at the vicinity of the edge channel” encompasses. The figures do not illustrate the loop of edges.

### ***Claim Rejections - 35 USC § 102***

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. As best understood, claims 15 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Collins et al.

Collins discloses the method of cutting a web comprising: cutting off at least one edge laterally (Fig. 9-13); cutting said at least one edge along a direction transverse to the conveyance direction (Fig. 2); taking up said at least one edge into processing line (Fig. 1); securing said at least one edge (Fig. 1); opening the channel (Fig. 3-5); cutting the central portion (Fig. 2 and 9-13); and forming a loop of edges (Fig. 1).

### ***Conclusion***

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Huskey, Geeson, Lenk et al. and Sumida et al. Are cited to show related device.
